

MASONS ORA- BROWNING FAIR

Two Weeks' Bazaar Begun by Anacostia Fraternal Organizations.

WASHINGTON TIMES BUREAU,
ANACOSTIA, D. C., MAY 17.

Members of the Masonic fraternity are gratified at the success attending the opening of the Masonic fair last night in Anacostia. Masonic Hall, at the corner of Fourteenth and U streets, where the fair is being conducted, was elaborately decorated.

Anacostia Lodge, No. 2, F. A. A. M., and Electa Chapter, No. 2, O. E. O., of the Eastern Star, the organizations which are conducting the fair, were represented by practically the entire membership. The officers of the grand lodge of the District were present, as were those of the grand chapter of the Eastern Star.

Dr. George C. Ober, the grand master of the grand lodge of Masons in the District, was guest of honor. He addressed the gathering and described the growth of Anacostia lodge and the efforts to erect a temple. He spoke of the efforts of the Masons have succeeded in doing, and the small debt that remains will be liquidated through the fair, it is expected. Music for dancing was furnished by Moody's orchestra. The bazaar will continue for two weeks. Wednesday night next has been designated as Blue Lodge night, while Friday night has been set aside as Eastern Star night. Monday night, May 23, the Mystic Shriners will attend the fair.

Synopsis of Chapters Already Published.

A young newspaper reporter, who is a "hooker" meets in a New York City restaurant, New York, which he boldly enters, although penniless, determined to get a meal, a man named Faraday, who is likewise without money. The stranger asks the reporter to pawn for him a watch belonging to his mother, part of the proceeds of which are used to defray the cost of their meals. He then requests that the newspaperman read two letters which he has just received. One is from Esther Spaulding, the daughter of Dr. Spaulding, Faraday's guardian, whose hand has been refused him, and the other from the old physician. The doctor states that he is dying, and wants to clear up for Faraday the facts of his parentage, which have heretofore been a mystery to him. He tells him that his father was found at his desk in his home in Culpeper, Mass., with his throat cut from ear to ear. A lamp with a green shade was burning on his side. The lamp had continued to burn ever since and the house has come to be known as haunted. He states that a fortune was left him, but no trace of it has ever been found. Faraday and the reporter decide to go to Culpeper, and make an investigation. They visit a gambling den to accumulate funds for the trip and become embroiled in a fight. The reporter is separated from Faraday.

CHAPTER VI.

The Question of a Lodging.

It seemed a veritable age before we reached the end of that first flight of stairs. I remember that I found time, in intervals of choking the man on top of me, to make him relinquish his very evident intention of gouging out one of my eyes with the edge of the steps would so dent my back that it would look like a section of gutter. I knew it felt as if it were going to be that way, at any rate.

But finally we brought up with a thud, and the other fellow cracked his head on the rickety banister, and I could feel the relaxation of his fingers that he had been clutching my neck.

Scrambling to my feet, I bethought me of the revolver which I had taken from Faraday. I saw that he was looking at me above some one lit the gas, and at my elbow one of the tenants of the house opened a door and poked out a sleepy, snoring head. The lamp which he held above his head.

By its light I made out that the man who had been with me was wearing a hat and that there was on a bench at the foot of the stairs a bucket of stagnant water. While, despite my metropolitan newspaper training, must confess that I have never been able to venture on the side of a street without a guide or a street directory in my pocket—and even in the latter case I was accustomed to my way and to be put on a car and started toward civilization by a friendly policeman.

So I was able to find my way to the assistance; but in the end, by dint of questioning everybody we met, and of listening to the most preposterous and contradictory statements, we managed to get to the place where we were looking for a lodging.

CHAPTER VII.

The Beau Gallant.

FARADAY'S "something of a journey" proved to be pretty considerable of a journey before we were through with it.

I took us down the Bowery to Park Row, and so through to Broadway and down to South Ferry. There we took a morning boat; by the clock in the ferryhouse, I saw that we had past 2 when we reached Brooklyn.

And, once across the river, we were met by a man in a uniform, who told us that Faraday had been in his sleep. He, of course, had very little knowledge of the intricacies of Brooklyn, and only knew that the wharf was somewhere in the neighborhood of the East River.

While, despite my metropolitan newspaper training, must confess that I have never been able to venture on the side of a street without a guide or a street directory in my pocket—and even in the latter case I was accustomed to my way and to be put on a car and started toward civilization by a friendly policeman.

So I was able to find my way to the assistance; but in the end, by dint of questioning everybody we met, and of listening to the most preposterous and contradictory statements, we managed to get to the place where we were looking for a lodging.
